

Acoustic irradiation of individual booths in a physiotherapy practice. Individually designed surfaces can memorize playlists. The EIB sensing devices in each individual booth can request these playlists and regulate the volume intensity.

inSynergie components:

- iMaster XL
- iAudioServer 24
- iOperate Software Module
- iTag DB
- iSEIB Interface

additional components:

- Audio Amplifier
- Speakers
- Sound Card 8-fold
- EIB-Sensors (sensing device)
