

inSynergie also offers customizable solutions for the standard application conference room. The inSynergie media control communicates with all common bus systems, e.g. EIB/KNX, RS-232/422 and DMX. Due to the use of standard network interfaces, any scale is possible. Therefore all control tasks are processed reliably even in large installations. Conventional media devices can be integrated via infrared, MIDI, GPIO contacts etc. The connection of an IP camera is also possible.

The mighty script language guarantees a quick project implementation as a result of the homogeneous connection of the control modules. The complete integration of the conference room control in the inSynergie media control system allows the simple realization of requirements that exceed a standard conference room solution. inSynergie offers you a direct support. When quick assistance is needed, we can access your system via remote support and execute the necessary steps.

## inSynergie components:

- Touchpanel 15" Wall Mount
- Touchpanel 10,4" Tabletop
- 16 Button Matrix Keypad
- iSMaster S
- Touchpanel 8,4" Wireless
- IR Receiver
- iSEIB Interface

## additional components:

- EIB Sensors
- Motor Screen
- DVD Player
- AV Switcher
- Projectors
