

# Smart Home

---

inSynergie is the first manufacturer to feature a complete Smart Home solution that covers all multimedia-based requests. The iSAudioServer fills up to 96 zones with sound. Centrally stored play lists are arbitrarily accessible, and external sound can also be routed to individual zones. The iSSmart HTPC is the setup box for the living room and replaces all other devices. It combines CD and DVD player as well as satellite receiver and HDD recorder and enables access to the Internet.

The picture of the door camera can be displayed on the TV screen as soon as the doorbell rings. Even the door opener can be operated with the iSSmart HTPC. The automatic time shift function assures that you will not miss a second of the current show. All functions of the inSynergie Smart Home solution can be combined freely. The touchpanel user interfaces are also customizable as desired.
